

# UniGreen 100% Bamboo Cups

UniGreen is working towards a greener future for all, by aiming to replace all wood pulp paper and plastic consumable goods, with products made from Bamboo - the world's fastest growing renewable plant source.

UniGreen Products are recyclable and biodegradable, as well as providing an active solution in the war against soil erosion. All at no additional cost to the customer.

## Why Bamboo?

- We're changing the beginning by **cutting down less trees** and **replacing wood pulp and plastic products** with bamboo products
- **Be green** with no compromise on **cost or quality**
- Our bamboo products are **recyclable**, **biodegradable** and **FSC accredited**
- It is the **single fastest** growing plant on the planet (3-5 years)  
*Trees require decades to mature*
- It **thrives** in depleted soil and retains soil moisture to **encourage regrowth**  
*The harvesting of our wood forests deplete soil and cause extensive soil erosion*
- It generates **38% more oxygen** and **removes more carbon dioxide** from the air than trees
- It **creates** jobs and **boosts** economic development

UniGreen Bamboo Cups, used for hot and cold beverages, are made from 100% bamboo and are a completely environmentally friendly, cost-effective and sensible choice over conventional paper or plastic products.
